

RAJASUMA D.K

Software Development Engineer in Test (SDET)

Chennai, India | [+91 7358800276](tel:+917358800276) | rs.dk.00001@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Results-driven Software Test Engineer with **2 years of combined experience** in **Manual and Automation Testing**. Skilled in **Playwright (JavaScript)**, **API testing** using **Postman**, and **mobile application automation** with **Maestro** for Android and iOS. Hands-on experience with **CI/CD pipelines**, **Docker**, and **Cloudflare R2** cloud storage platforms. Strong knowledge of **STLC**, test automation frameworks, and scalable test solution development

TECHNICAL SKILLS

Automation Tools: Playwright, Postman, Maestro (Android & iOS)

Programming: JavaScript

Test Frameworks: Page Object Model (POM), Data-driven Frameworks

CI/CD & DevOps: Jenkins, GitHub Actions, Docker

Cloud & Storage: Cloudflare R2

Version Control: Git, GitHub

Manual Testing: Test Case Design, Defect Reporting, Functional, Regression, Sanity, Smoke & API Testing

Defect Tracking: Jira

AI & Developer Tools: Claude Code, GitHub Copilot

PROFESSIONAL EXPERIENCE

Software Development Engineer in Test, Scizers Technologies Pvt. Ltd, (Remote)

12/2025 – Present

Domain: Real Estate, Travel & Hospitality (Web & Mobile Applications)

- **Web Testing:** Delivered end-to-end test automation for a real estate web application using **Playwright (JavaScript)**, covering functional, regression, and UI workflows across **Automated 25+ test cases**, achieving ~80% regression coverage and cutting manual testing effort by 35%
- **Mobile Testing:** Built and maintained cross-platform mobile test suites for **Android & iOS** using **Maestro**, validating 15+ critical user journeys including property search, listing, leads and calling flows.
- **CI/CD Integration:** Configured **Jenkins + Docker CI/CD pipelines** to trigger automated Playwright test suites on every build, reducing release validation time from ~3 hours to under 45 minutes
- **Cloud Storage:** Configured **Cloudflare R2 storage** integration with Jenkins pipelines to automatically upload and host HTML test reports post-build, generating a public shareable link per run — enabling stakeholders to access live build reports without Jenkins access.

Key Achievements:

- **Independently handled end-to-end testing** activities for web and mobile applications, including test planning, automation development, execution, and defect reporting
- **Reporting & Alerting:** Configured Jenkins pipeline webhooks to deliver automated pass/fail test notifications to Microsoft Teams, improving team visibility into build health and enabling faster hotfix response.

Software Test Engineer, Coda Payments Pvt. Ltd, (Remote)

08/2024 – 09/2025

Domain: FinTech / Digital Payments

- Contributed to testing web-based payment and partner management products in the **finance domain**
- Designed and executed comprehensive test cases for new features and enhancements
- Collaborated across QA, development, and product teams to ensure timely and high-quality releases
- Used **JIRA** for defect tracking and test case management
- Performed **API testing** using **Postman**, validating responses and status codes
- Independently owned end-to-end testing responsibilities across multiple projects from planning to closure

Key Achievements:

- Improved defect catch rate by introducing **edge-case** scenarios into the regression suite
- Acted as a bridge between QA and development teams during UAT for new partner integrations

AUTOMATION PROJECTS

AI + Playwright Integration Testing Framework [\[GitHub Link\]](#)

(Personal Project | 2025)

Technologies: Playwright, JavaScript, Groq API (Llama 3.1), GitHub Actions, Git, Node.js

- Developed an end-to-end Playwright automation framework for the Dream Portal web application using **Page Object Model (POM)** architecture.
- Automated UI validation, table verification, multi-tab navigation, and recurring dream summary validation across multiple pages.
- Integrated the **Groq Llama-3.1-8B-Instant API** to validate AI-powered dream classification against application results.
- Configured **GitHub Actions** CI/CD pipeline for cross-browser execution (Chromium, Firefox, WebKit) with automated HTML reports and CTRF test summaries.

EDUCATION

Bachelor of Information Technology

2017 – 2021 | CGPA: 7.91 / 10

Jaya Engineering College, Chennai

CERTIFICATIONS

- **Claude Code in Action** - Anthropic, 2026
- **Introduction to Playwright** - Applitools (ID:47fa8d86), 2025
- **Postman API Fundamentals** Student Expert, 2025
- **ISTQB Foundation Level Certified** - GASQ, 2024
- **Artificial Intelligence Workshop** – Infogro Technologies (INFO/DECEMBER/764)
- **Certified Professional Coder (CPC)** – Shiash Info Solutions, 2021
